AUTHOR INDEX – 1975

Blinder, S.
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Brenden, J. J.
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Brenden, J. J.
Wood-Base Building Materials: Rate of Heat Release, p. 274

Bryan, J. L.
Human Behavior in the Fire Situation, p. 17

Burleson, D. C.
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Cagliostro, D. E.
Intumescent Coating Modeling, p. 205

Chien, W. P.
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

Clark, K. J.
Intumescent Coating Modeling, P. 205

Corlett, R. C.
On the Equivalence of Two Fire Suppression Criteria, p. 119

Curnes, G. T.
A Computer Program for the NBS Smoke Density Test, p. 228

DeGroot, W. F.
Heat Content of Natural Fuels, p. 311

Depew, C. A.
On the Equivalence of Two Fire Suppression Criteria, p. 119

de Ris, J.
Flame Spread Along Fuel Edges, p. 140

Duvvuri, M. S.
The Pyrolysis of Natural Fuels, p. 468

Eickner, H. W.
Fire Endurance of Wood-Panels and Sandwich Wall Panels, p. 155

Fewell, L. L.
An Effective and Practical Fire-Protection System, p. 492

Fielding, G. H.
Halon 1301: Mechanism of Failure to Extinguish Deep-Seated Fires, p. 37

Fish, R. H.
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Fookson, A.
Comparative Performance of Ionization vs. Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Frisch, K. C.
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Funt, J. M.
Estimation of the Fire Behavior of Polymers, p. 28

Gilwee, Jr., W. J.
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Gilwee, Jr., W. J.
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Hadvig, S.
The Collapse-Time of Plastic Rooflights During Fire, p. 191

Heskestad, G.
Physical Modeling of Fire, p. 253

Hilado, C. J.
A Computer Program for the NBS Smoke Density Test, p. 228

Hilado, C. J.
A Method for Estimating Limits of Flammability, p. 130

Hilado, C. J.
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Hilado, C. J.
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide p. 44

Ifshin, S.
The Proper Perspective on the Public Fire Services: Contribution to Safety, p. 65

Iqbal, K. Z.
The Pyrolysis of Natural Fuels, p. 468

Jacobs, M. I.
Factors Affecting the Measurement of Smoke Generation by Burning Polymers, p. 347

King, T. Y.
Empirical Relationships Between Optical Density and Mass Density of Smoke, p. 222

Kourtides, D. A.
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Kourtides, D. A.
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Kresta, J. E.
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Lee, T. G.
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Liepins, R.
Oxygen Index and Char Yield on Polyester Fibers, p. 326

Lopez, E. L.
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Magill, J. H.
Estimation of the Fire Behavior of Polymers, p. 28

Malone, W. M.
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Mansfield, J. A.
An Effective and Practical Fire-Protection System, p. 492

Markstein, G. H.
Flame Spread Along Fuel Edges, p. 140

Martin, J. R.
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

May, M.
Comparative Performance of Ionization vs. Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Miller, B.
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Mudry, W. L.
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Muhlenkamp, S. P.
The Pyrolysis of Natural Fuels, p. 468

Nawata, T.
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Parker, J. A.
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Parker, J. A.
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Parker, W. J.
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Riccitiello, S. R.
An Effective and Practical Fire-Protection System, p. 492

Riccitiello, S. R.
Intumescent Coating Molding, p. 205

Schwarcz, J. M.
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Seader, J. D.
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

Shafizadeh, F.
Heat Content of Natural Fuels, p. 311

Shimizu, A. B.
Intumescent Coating Modeling, p. 205

Small, F. H.
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide, p. 44

Snyder, G. E.
A Fire Exposure Test for Evaluating Thermal Insulation, p. 362

Susott, R. A.
Heat Content of Natural Fuels, p. 311

Suzuki, S.
The Effect of Chlorinated Polyethylene on The Combustion of Polyethylene, p. 451

T'ien, J. S.
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Tryon, M.
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Tsuchiya, Y.
Equilibrium Composition of Fire Atmospheres, p. 5

Uehara, Y.
The Effect of Chlorinated Polyethylene on The Combustion of Polyethylene, p. 451

Vyas, R. J.
End-Grain Ignition of Wood, p. 355

Wagner, J. P.
Comparative Performance of Ionization vs Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Watson, S. C.
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Welker, J. R.
End-Grain Ignition of Wood, p. 355

Welker, J. R.
The Pyrolysis of Natural Fuels, p. 468

Williams-Leir, G.
Equilibrium Composition of Fire Atmospheres, p. 5

Yu, T. I.
On the Equivalence of Two Fire Suppression Criteria, p. 119

SUBJECT INDEX – 1975

Acceleration of Burning
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Acetaldehyde
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide, p. 44

Aircraft
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Aircraft Interiors
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Aircraft Interiors
Thermochemical Characterization of Air-Craft Interior Panel Materials, p. 373

Arrhenius Kinetic Expression
The Pyrolysis of Natural Fuels, p. 468

Asbestos-Free Materials
A Fire Exposure Test for Evaluating Thermal Insulation, p. 362

Autoignition Temperature
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide, p. 44

Building Codes
The Proper Perspective on the Public Fire Services' Contribution to Safety, p. 65

Building Fires
Equilibrium Composition of Fire Atmospheres, p. 5

Building Fires
Human Behavior in the Fire Situation, p. 17

Building Materials
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Building Materials
Wood-Base Building Materials: Rate of Heat Release, p. 274

Cellulose
The Pyrolysis of Natural Fuels, p. 468

Char Yield
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Char Yield
Oxygen Index and Char Yield on Polyester Fibers, p. 326

Chemical Thermodynamics
Equilibrium Composition of Fire Atmospheres, p. 5

Chlorinated Polyethylene
The Effect of Chlorinated Polyethylene on the Combustion of Polyethylene, p. 451

Class A Fires
Halon 1301: Mechanism of Failure to Extinguish Deep-Seated Fires, p. 37

Coatings
An Effective and Practical Fire-Protection System, p. 492

Collapse-Time
The Collapse-Time of Plastic Rooflights During Fire, p. 191

Combustibility
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Combustion
The Effect of Chlorinated Polyethylene on the Combustion of Polyethylene, p. 451

Combustion
Thermochemical Characterization of Air craft Interior Panel Materials, p. 373

Combustion Mechanisms
Halon 1301: Mechanism of Failure to Extinguish Deep-Seated Fires, p. 37

Combustion Products
Comparative Performance of Ionization vs Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Combustion Products
Equilibrium Composition of Fire Atmospheres, p. 5

Combustion Products
Halon 1301: Mechanism of Failure to Extinguish Deep-Seated Fires, p. 37

Combustion Products
Physical Modeling of Fire, p. 253

Combustion Thermodynamics
Heat Content of Natural Fuels, p. 311

Compartment Fires
Equilibrium Composition of Fire Atmospheres, p. 5

Composites
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Construction Materials
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Correlation
Empirical Relationships Between Optical Density and Mass Density of Smoke, p. 222

Dacron® 900F
Oxygen Index and Char Yield on Polyester Fibers, p. 326

Damkohler Number
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Decomposition Rate
The Pyrolysis of Natural Fuels, p. 468

Deep-seated Fires
Halon 1301: Mechanism of Faiure to Extinquish Deep-Seated Fires, p. 37

Density
Empirical Relationships Between Optical Density and Mass Density of Smoke, p. 222

Design
The Collapse-Time of Plastic Rooflights During Fire, p. 191

Dibromotetrafluoroethane
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Diffusion Flames
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Dripping, Effect of
Factors Affecting the Measurement of Smoke Generation by Burning Polymers, p. 347

DTA-GC, TG
The Effect of Chlorinated Polyethylene on the Combustion of Polyethylene, p. 451

Edge Effect
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Edge Spread
Flame Spread Along Fuel Edges, p. 140

Electronic Control Cabinet
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Empirical Relationships
Empirical Relationships Between Optical Density and Mass Density of Smoke, p. 222

Enclosure Fires
Physical Modeling of Fire, p. 253

Equilibrium Composition
Equilibrium Composition of Fire Atmospheres, p. 5

Ethylene Oxide
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Ethylene Oxide
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide, p. 44

Extinction Condition
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Extinction Criterion
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Fiber Sample Holder
Oxygen Index and Char Yield on Polyester Fibers, p. 326

Fire
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Fire Atmospheres
Equilibrium Composition of Fire Atmospheres, p. 5

Fire Behavior
Estimation of the Fire Behavior of Polymers, p. 28

Fire Departments
The Proper Perspective on the Publid Fire Services' Contribution to Safety, p. 65

Fire Detectors, Photoelectric
Comparative Performance of Ionization vs. Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Fire Dynamics
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Fire Endurance
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Fire Endurance
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Fire Exposure Test
A Fire Exposure Test for Evaluating Thermal Insulation, p. 362

Firefighting
Halon 1301: Mechanism of Failure to Extinguish Deep-Seated Fires, p. 37

Fire Hardening
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Fire Modeling
Physical Modeling of Fire, p. 253

Fire Prevention
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Fire-Protection Coatings
An Effective and Practical Fire-Protection System, p. 492

Fire Protection Engineering
The Proper Perspective on the Public Fire Services' Contribution to Safety, p. 65

Fire Protection
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Fire Protection in Buildings
Human Behavior in the Fire Situation, p. 17

Fire Protection
Intumescent Coating Modeling, p. 205

Fire-Protection System
An Effective and Practical Fire-Protection System, p. 492

Fire Resistant Materials
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Fire Retardant
The Effect of Chlorinated Polyethylene on the Combustion of Polyethylene, p. 451

Fire Retardation
The Effect of Chlorinated Polyethylene on the Combustion of Polyethylene, p. 451

Fire Safety (Aircraft)
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Fire Safety
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Fire Tests
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Fire Threat Variables
Human Behavior in the Fire Situation, p. 17

Fire Ventilation
The Collapse-Time of Plastic Rooflights During Fire, p. 191

Flammability
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Flammability
A Method for Estimating Limits of Flammability, p. 130

Flammability
Estimation of the Fire Behavior of Polymers, p. 28

Flammability
Oxygen Index and Char Yield on Polyester Fibers, p. 326

Flammability
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Flammability of Isocyanurate Foams
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Flammable Limits
A Method for Estimating Limits of Flammability, p. 130

Flame Propagation
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Flame Spread
Apparatus for Measuring Rate of Heat Release from Building Materials, p. 50

Flame Spread
Flame Spread Along Fuel Edges, p. 140

Flame Spread Index
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Flame Temperatures
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Flaming Conditions
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Froude Number Modeling
Physical Modeling of Fire, p. 253

Fuel Composition
Heat Content of Natural Fuels, p. 311

Fuel
Flame Spread Along Fuel Edges, p. 140

Fuels, Mine
Comparative Performance of Ionization vs Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Full-Scale Fires
The Proper Perspective on the Public Fire Services' Contribution to Safety, p. 65

Furnace (FPL)
Wood-Base Building Materials: Rate of Heat Release, p. 274

Gas-Fired Furnace
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Gas Sensing Techniques
Comparative Performance of Ionization vs Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Grain, Wood
End-Grain Ignition of Wood, p. 355

Groups
Human Behavior in the Fire Situation, p. 17

Halon 1301
Halon 1301: Mechanism of Failure to Extinguish Deep-Seated Fires, p. 37

Hardboard
Wood-Base Building Materials: Rate of Heat Release, p. 274

Heat Emission
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Heat Load
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Heat of Combustion
Heat Content of Natural Fuels, p. 311

Heat Release
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Heat Release Rate
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Heat Release
Equilibrium Composition of Fire Atmospheres, p. 5

Heat Release
Wood-Base Building Materials: Rate of Heat Release, p. 274

Heat Transfer Fluid
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Housing
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Human Behavior
Human Behavior in the Fire Situation, p. 17

Ignition
End-Grain Ignition of Wood, p. 355

Ignition
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Ignition Temperature
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Individuals
Human Behavior in the Fire Situation, p. 17

Insulation, Thermal
A Fire Exposure Test for Evaluating Thermal Insulation, p. 362

Intumescence
Intumescent Coating Modeling, p. 205

Ionization
Comparative Performance of Ionization vs Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Isocyanurate
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Isocyanurate Foams
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Isomerization
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide, p. 44

Kinetic Parameters
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Kinetic Parameters
The Pyrolysis of Natural Fuels, p. 468

Lewis Number
A Discussion on the Extinction Condition of a Diffusion Flame, p. 101

Light Extinction
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

Mass Density
Empirical Relationships Between Optical Density and Mass Density of Smoke, p. 222

Mathematical Model
Intumescent Coating Modeling, p. 205

Metal Alkyl Solutions
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Modeling
Estimation of the Fire Behavior of Polymers, p. 28

Modeling
Intumescent Coating Modeling, p. 205

Molecular Structure
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Natural Fuels
Heat Content of Natural Fuels, p. 311

Natural Fuels
The Pyrolysis of Natural Fuels, p. 468

NBS Smoke Chamber
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

NBS Smoke Density Chamber
Factors Affecting the Measurement of Smoke Generation by Burning Polymers, p. 347

NBS Smoke-Density Chamber
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

NBS Smoke Density Chamber
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Nonflaming Conditions
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Optical Density
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

Optical Density
Rate of Smoke Evolution From Burning Polymeric Materials, p. 554

Optical Density
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Organic Compounds
A Method for Estimating Limits of Flammability, p. 130

Organometallic Compounds
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Oxygen Index
Oxygen Index and Char Yield on Polyester Fibers, p. 326

Oxygen Index
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Paint
Intumescent Coating Modeling, p. 205

Panel Interiors, Aircraft Interiors
Thermochemical Characterization of Air craft Interior Panel Materials, p. 373

Paper Char Test
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Paper Honeycomb
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Particleboard
Wood-Base Building Materials: Rate of Heat Release, p. 274

Particulate Matter
Physical Aspects of Smoke Development in an NBS Smoke-Density, Chamber, p. 294

Photoelectric Fire Detectors
Comparative Performance of Ionization vs. Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Physical Aspects of Smoke
Physical Aspects of Smoke Development in the NBS Smoke-Density Chamber, p. 294

Pipe Insulation
A Fire Exposure Test for Evaluating Thermal Insulation, p. 362

Pipe Insulation
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Plastic Rooflights (PVC)
The Collapse-Time of Plastic Rooflights During Fire, p. 191

Plywood
Wood-Base Building Materials: Rate of Heat Release, p. 274

Polyalkylene Oxide
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Polyamide
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Polycylic Aromatic Polymers
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Polydispersion
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

Polyester Fibers
Oxygen Index and Char Yield on Polyester Fibers, p. 326

Polyethylene
The Effect of Chlorinated Polyethylene on the Combustion of Polyethylene, p. 451

Polymer Combustion
The Effect of Chlorinated Polyethylene on The Combustion of Polyethylene, p. 451

Polymeric Materials
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Polymer Mixtures
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Polymers
Estimation of the FiryBehavior of Polymers, p. 28

Polymers
Factors Affecting the Measurement of Smoke Generation by Burning Polymers, p. 347

Polymers
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Polymers
The Edge Effect in the Determination of the Oxygen Index of Isocyanurate Foams, p. 488

Polymethyl Methacrylate
Flame Spread Along Fuel Edges, p. 140

Polyvinyl Fluoride
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Pressure Modeling
Physical Modeling of Fire, p. 253

Public Fire Services
The Proper Perspective on the Public Fire Services' Contribution to Safety, p. 65

Punk Smoke
Comparative Performance of Ionization vs. Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Pyrolysis
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Pyrolysis
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide, p. 44

Pyrolysis
The Effect of Chlorinated Polyethylene on the Combustion of Polyethylene, p. 451

Pyrolysis
The Pyrolysis of Natural Fuels, p. 468

Pyrolytic Degradation Products
Comparative Performance of Ionization vs. Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Pyrophoricity
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Pyrotector SK700
Comparative Performance of Ionization vs. Photoelectric Fire Detectors-Pyrolytic Degradation Products, p. 511

Red Oak
Wood-Base Building Materials: Rate of Heat Release, p. 274

Safety
The Proper Perspective on the Public Fire Services' Contribution to Safety, p. 65

Sample Thickness, Effect of
Factors Affecting the Measurement of Smoke Generation by Burning Polymers, p. 347

Sandwich Configuration
An Effective and Practical Fire-Protection System, p. 492

Sawdust Test
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Self-Heating
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Sheath System
An Effective and Practical Fire-Protection System, p. 492

Single Scattering Phenomena
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

Smoke Development
Physical Aspects of Smoke Development in an NBS Smoke-Density Chamber, p. 294

Smoke
Empirical Relationships Between Optical Density and Mass Density of Smoke, p. 222

Smoke Emission
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Smoke Evolution
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Smoke
Factors Affecting the Measurement of Smoke Generation by Burning Polymers, p. 347

Smoke Measurement
Factors Affecting the Measurement of Smoke Generation by Burning Polymers, p. 347

Smoke Measurement
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Smoke
Thermochemical Characterization of Aircraft Interior Panel Materials, p. 373

Specific Optical Density
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Spontaneous Combustion
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Sprinklered Fires
Physical Modeling of Fire, p. 253

Structural Sandwich
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Test Method
A Simple Method for Gauging the Pyrophoricity of Metal Alkyl Solutions, p. 478

Test Method
Estimation of the Fire Behavior of Polymers, p. 28

Test Method
The Collapse-Time of Plastic Rooflights During Fire, p. 191

Testing
A Fire Exposure Test for Evaluating Thermal Insulation, p. 362

Textile Flammability
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Textiles
Flame Spread Along Fuel Edges, p. 140

Thermal Conductivity
End-Grain Ignition of Wood, p. 355

Thermal Decomposition
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Thermal Decomposition
Heat Content of Natural Fuels, p. 311

Thermal Insulation
A Fire Exposure Test for Evaluating Thermal Insulation, p. 362

Thermal Insulation
Fire Prevention and Fire Protection Aspects of Thermal Insulation, p. 336

Thermal Insulation
Isomerization as a Possible Mechanism for Apparent Lowering of Autoignition Temperature of Ethylene Oxide, p. 44

Thermally Induced Interactions
A Methodology for the Interpretation of the Thermal and Flammability Behavior of Multicomponent Fibrous Polymer Systems, p. 105

Thermal Protection
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Thermal Response Time
Intumescent Coating Modeling, p. 205

Thermochemical Parameters
Fire Dynamics of Modern Aircraft from a Materials Point of View, p. 534

Thermogravimetric Analysis
The Pyrolysis of Natural Fuels, p. 468

Time, Function of
Rate of Smoke Evolution from Burning Polymeric Materials, p. 554

Total Heat Content
Apparatus for Measuring Rate of Heat Release From Building Materials, p. 50

Toxic Combustion Products
Halon 1301: Mechanism of Failure to Extinguish Deep-Seated Fires, p. 37

Urethane
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Urethane Foam, Rigid
Laboratory Fire Performance Characteristics of a Dibromotetrafluoroethane-Blown Rigid Polyurethane Foam, p. 499

Ventilation Flow Rate
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Visibility
Smoke Emission From Burning Cabin Materials and the Effect on Visibility in Wide-Bodied Jet Transports, p. 405

Wallboard Assembly
Wood-Base Building Materials: Rate of Heat Release, p. 274

Walls
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Weight Loss
The Pyrolysis of Natural Fuels, p. 468

Wood
End-Grain Ignition of Wood, p. 355

Wood Frame
Fire Endurance of Wood-Frame and Sandwich Wall Panels, p. 155

Wood, Punky
The Pyrolysis of Natural Fuels, p. 468
